Know Before You Go

A little preparation can make your car time a highlight of the trip.

Some Things to Do Before You Go

⭐ Make a playlist of your family’s favorite songs that you can listen to on the road.
⭐ Fill a jar with interesting questions that can inspire interesting conversations—serious, silly, or otherwise. Examples might be: “If you could plan the perfect meal, what would it be?” or “If you were a superhero, what would your name be? And what would your superpower be?”
⭐ Make Road-Trip’n bingo part of the fun on your Field Trip. Make your own cards or download a pack of bingo cards for the region(s) of Minnesota you plan to explore this fall. Find them at ExploreMinnesota.com. Be sure to pack enough markers and cards for everyone!

Take the Classroom With You

With many students doing some form of distance learning right now, why not do school on the road? Pack up your schoolwork, plus a few extra tools like these:

- A journal to record your experiences or write stories inspired by what you see
- A tape measure for measuring things you see on your travels or calculating area or volume (How big are Paul Bunyan’s shoes, anyway?)
- A sketchbook and some colored pencils to practice art techniques—especially after visiting an art museum
- A pocket-sized world language dictionary (How do you say “Are we there yet?” in French?)
- A deck of cards or some dice to play math games
- A chart of constellations, rock formations, and native plants or animals

Did you know the Land of 10,000 Lakes actually has closer to 12,000 lakes? Or that Minnesota has a state muffin? (Blueberry.) Or that the name “Minnesota” comes from Dakota Indian words meaning “sky-tinted waters” or “sky-blue waters”? Learn all kinds of interesting facts like these at ExploreMinnesota.com. Check it out before you hit the road!

## Car Activities

Car games are one of the best parts of any road trip. Play a classic or try a new one. Here are some ideas:

### WHAT AM I COUNTING?

One person starts counting something out loud when they see it, but they don’t tell anyone what they are counting. Everyone else in the car pays attention to try to figure out what they are counting—if they are counting rapidly and regularly, maybe it’s light poles or road signs. If their counting is random and more infrequent, maybe it’s a particular kind of car or building. Whoever guesses correctly gets to be the next counter.

### ALPHABET CATEGORIES

Pick a general category that everyone is familiar with, like food, animals, etc. The first person thinks of something that starts with “A” that fits the category, the second person “B”, and so on.

### MINUTE TO WIN IT-CAR VERSION

Person A chooses a category and bets on how many things they can name in that category in one minute. For instance, “I bet I can name 10 zoo animals in a minute.” Person B can either up the ante (“I bet I can name 12 zoo animals in a minute.”) or say “Prove it.” The game goes back and forth as long as the players are betting, but once someone says “Prove it,” the other person has to complete their last bet. If they can do it, they get a point. If they can’t, the other person gets a point. Then Person B gets to choose the category. The first person to five points (or whatever you choose) wins!

### MAKE A RULE

Each person in the car gets to make up one silly (and safe) rule. Examples: Every time we go under a bridge, we all have to quack. If we pass a red car we all have to say “red car”. Or: If we see a cow, touch your nose. Every time a rule is enforced, the last person to do the task gets a point. The person with the fewest points once you reach your destination is the winner.

### SIGN ALPHABET

Look for each letter of the alphabet—in order—on signs, license plates, trucks, and anything with words as you pass them on the road. Whoever completes the alphabet first wins. Variation: Work together as a family to complete the alphabet as a team.

### 20 QUESTIONS

Play the classic game of 20 questions, where someone thinks of a person, place, or thing, and the others in the car get to ask yes/no questions to try to figure out what the person is thinking of. Mix it up by playing Number 20 Questions where one person thinks of a number between 1 and 100 and everyone tries to guess what number they are thinking of by asking math questions, like “Is your number even?” or “Is it a prime number?” or “Is your number divisible by five?”
